

24 EUDAT partners involved in the EOSC-Hub project, expected to start in early 2018

It's a recent news that the European Commission has successfully received the proposal for the **EOSC-hub project**, submitted at the end of March 2017 as a Research Innovation Action to the H2020-INFRA-13-2017 (a) call, which is expected to start in early 2018.

The scope of the EOSC-hub project is to create the integration and management system of the future **European Open Science Cloud** that delivers a catalogue of services, software and data from the **EUDAT CDI**, **EGI Federation**, **INDIGO-DataCloud** and major research e-infrastructures. This integration and management system (the Hub) builds on mature processes, policies and tools from the leading European federated e-Infrastructures (including EUDAT) to cover the whole life-cycle of services, from planning to delivery.

EUDAT and the EGI Foundation play two key roles within EOSC-hub, respectively being the project director and the project coordinator, with the collaboration of other European Research Infrastructures, national e-

EUDAT receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 654065.

Infrastructure providers, SMEs and academic institutions.
