

Celebrate Open Access Week 2017 with OpenAIRE webinars

After the 2016's theme "**Open in Action**", which provided an incentive to broaden the scope and involve all stakeholders, researchers as well as the general public, this year's topic will be "**Open in order to...**". This theme is to be considered an invitation to answer the question of what concrete benefits can be realized by making scholarly outputs openly available, a prompt to move beyond talking about openness in itself and focus on what openness enables.

To celebrate Open Access Week, **OpenAIRE** has scheduled a **series of webinars** on a variety of topics, including discipline-specific tools and workflows, the legal aspects of Open Science, and an interactive session on Research Data Management.

Interested in joining? Check out the calendar below and save your spot by **registering by Friday 20 October 2017!** ([click here to register](#))
