An in depth look at the future CDI services

Let's meet at: 11:00 - 12:30, Room: Lagos | 24 Jan 2018

Session Chair: Mark van de Sanden, SURFsara

Objectives:

- Showcase new services and functionalities which are in the development pipeline
- Call for validation from potential users

More on the session:

In this session we will present and demonstrate new services and functionalities which are in the development pipeline. These developments concern:

- the B2FIND metadata service for discovery and access of distributed data
- the B2SAFE Data Policy Manager for centrally managing policies within the CDI,
- the integration of B2SAFE and B2SHARE for the management and harvesting of metadata,
- the newly developed B2STAGE HTTP API to provide a generic HTTP based API to the CDI B2 services,
- the B2NOTE for managing annotations on data and metadata,
- the Generic Execution Framework for running applications close to data,
- and the Data Distribution and Subscription Service to enable easy access and provisioning to data.

Speakers and Demos:

B2SAFE Data Policy Manager, Managing metadata - B2SHARE - B2SAFE integration, Generic Execution Framework, B2STAGE HTTP API, B2NOTE and/or the Data Distribution Service, and many others.
