Research communities & the CDI

Let's meet at: 11:00 - 12:30, Room: Sintra | 24 Jan 2018

Session Chair: Debora Testi, CINECA

Objectives:

Get an overview and discuss the roles of the research infrastructures within the EUDAT Collaborative Data Infrastructure

More on the session:

EUDAT believes that research communities should have a major role in the CDI; thus we are currently discussing about establishing a Research Board to ensure that the needs of the research communities are correctly captured by EUDAT future developments. This session will open the discussion about the role of such board and more largely of the research communities within the CDI. How can EUDAT best support the involvement of research communities in the CDI? What are the appropriate mechanisms to be able to influence the EUDAT agenda? The session will be interactive and leave significant room for questions and discussions.

Agenda:

11:00 - 11:30 Keeping research communities in the driving seat - empowering research infrastructures within the EUDAT CDI, Debora Testi, EUDAT User Engagement coordinator ([Presentation](#))

11:30 - 12:30 Questions & Discussion
