SUMMER SCHOOL
Managing scientific data from analysis to long-term archiving
23-27 September 2019, ICTP Trieste, Italy

CALL FOR APPLICATION OPEN - Deadline 15 June 2019
eudat.eu/eudat-prace-summer-school-2019

From 23-27 September 2019, EUDAT CDI and PRACE are organising a Summer School on "Managing scientific data from analysis to long term archiving". Taking place in the beautiful location of the [International Centre for Theoretical Physics \(ICTP\)](#) of Trieste (Italy), the school aims to build the foundational skills for managing and processing data within complex research environments. Starting from real use cases, the school will focus on all the steps part of a typical research data lifecycle (data discovery; data processing; data analysis; data preservation and publishing) combining frontal lessons with hands-on sessions.

Specific topics covered by the school are:

- Data processing and analysis including deep and machine learning methods
- Data management ranging from discovery to publication
- Data discovery
