

D2.2.1 Services Rolling Plan

WP:

WP2

Publication Date:

30/04/2012

This report summarises, in context, the goals of the EUDAT project and analyses the service usage patterns distilled from the (ongoing) user requirements capture process. It uses these patterns to motivate and prioritise the choice of core services essential to the successful rollout of the EUDAT collaborative data infrastructure; a high-level plan for the delivery of these services is presented in the final chapter.
