EUDAT to take part in TNC22

This year EUDAT will be participating in the TNC22 Conference as a Bronze Partner at the Trieste Conference Center in Trieste, Italy, from 14-16 September 2022.

TNC is the largest and most prestigious research and education networking conference, and attracts a truly diverse audience of over 800 participants from more than 70 countries, representing national and regional research and education networks, schools and universities, technology providers, and many of the world's most exciting scientific projects. The conference is organised by GÉANT, who EUDAT worked with to bring forward communities' networking and AAI requirements and to ensure that the networking infrastructure on which EUDAT relies remains strong enough to meet its existing and future needs.

EUDAT will have a booth in the TNC22's exhibition where EUDAT will showcase its service stack, which provides solutions for the complete research data lifecycle to help universities and research institutions to make and keep their data Findable, Accessible, Interoperable and Reusable (FAIR). FAIR data is more important than ever, as both the research community and European policy are pushing towards the FAIR-ification of research data. EUDAT will also be visible on the event's website, through the GEANT Connect Magazine and with a service webinar shortly

after the conference.

Come meet EUDAT representatives to learn how our solutions can benefit your research community. Network with EUDAT secretariat members and service owners to better understand how EUDAT can make your job easier.
