

D6.1 Initial Report on Status and Progress of Operations

WP:

WP6

Publication Date:

20/04/2012

The purpose of WP6 “Operations” is to make available the Collaborative Data Infrastructure for scientists and researchers by integrating and reliably operating services on top of distributed resources which are provided in a coordinated way. A collaborative operational and support infrastructure will be established in the course of the project following best practices and in compliance with widely accepted standards and guidelines in the domain of security and quality assurance.

The present document reports about the preparatory work done in accordance with the project plan and it outlines the achievements gained by operations during the first six project months.
