SC14 - Supercomputing2014

SC14 brings together the most respected minds in high performance computing, networking, storage and analysis to debut the research and innovation that will open the door to new scientific and economic opportunities. This year the conference takes place in New Orleans, Louisiana.

You can find EUDAT at the PRACE (the Partnership for Advanced Computing in Europe) booth (number **2215**). We would be very pleased to welcome you to the booth to talk about the possibilities EUDAT offers for HPC users. Project representatives will also be at the Barcelona Supercomputing Computer booth (number **3427**) and at the PSNC and PIONIER booth (number 2132), so feel free to pop by, find out more about the project and pick up your EUDAT gifts.

More information about the event is available on the [SC14 website](#).
