Data Staging and Data Movement in PRACE with EUDAT

This two-day course will describe the mechanisms that can be used to stage data to and from PRACE resources, which includes the UK ARCHER system. It will also introduce [EUDAT](#) and some of its services that are likely to be of interest to PRACE users working with large data files. Subjects that will be covered include: GridFTP, iRODS, Authentication methods.

For more details, including how to register, please see <http://events.prace-ri.eu/conferenceDisplay.py?confId=228>.
