## The 11th International Conference on High Performance Computing & Simulation - HPCS 2013

The 2013 High Performance Computing & Simulation International Conference is a forum for addressing, exploring and exchanging information on the state-of-the-art in high-performance and large-scale computing systems, their use in modelling and simulation, their design, performance and use, and their impact. Please join us in Helsinki this summer to hear Dr Per Öster, the Director at the CSC - IT Center for Science Ltd, Finland, who will be giving a talk about EUDAT's existing and planned services, and how they relate to HPC. As well as providing a general overview of the project, the talk will highlight the ways in which HPC users can benefit from the EUDAT services.
