

D7.2.2: Managing Data Curation and Long-Term Preservation in a Federated Environment (final)

WP:

WP7

Publication Date:

02/04/2015

The first iteration of the policy selection, implementation and evaluation process, as proposed in D7.2.1, is presented in this document. Together with the motivations why these selections have been made. The integration of the original task into the work package 5 Data Policy Manager task force is discussed and finally the Data Policy Manager is assessed on its potential to solve some of the scalability challenges in the EUDAT CDI.
