

Interested in trust and certification? Register now to the first EUDAT webinar, Monday April 18, 11.00-12.00 CEST

There is a growing international consensus on the need to preserve and share research data sets in a manner that maximises their long-term value. EUDAT is striving to enable European researchers from any research discipline to manage their data in a trustworthy environment.

Heiko Tjalsma (DANS), EUDAT task leader on “Trust and Certification” will be presenting a webinar for parties interested in learning more about certifying data repository services concentrating on European framework of certification levels for data repositories and the Data Seal of Approval.

Don't miss this great chance to learn more about one of the hot topics surrounding data management!
