Register now to the OpenAIRE/EUDAT webinar on Research Data Management! Thursday 26 May 2016 @2pm CEST

Special Edition - 23 May 2016

Whether measurements from sensors, results from simulations or interview recordings, modern scholarship **generates incredible amounts of digital information** which, properly kept and shared, **holds huge potential to drive new research and innovation**. Recognising this, funders are implementing **policies for Research Data Management and data sharing**. **Well-managed data foster good scientific practice and sharing well-formed, well-described data increases research impact.**

OpenAIRE and EUDAT co-present this webinar which aims to introduce researchers and others to the concept of Research Data Management (RDM).

What will you learn?

- To articulate the importance of research data management;
- To set clear goals regarding data archiving and sharing (both during and after a project)
- To understand the basic principles of data management, stewardship and archiving
- To identify appropriate RDM tools and services

Who should participate?
Introductory training for researchers, project coordinators and research administrators.

REGISTER NOW!

More on the webinar

OpenAIRE and EUDAT co-present this webinar which aims to introduce researchers and others to the concept of Research Data Management (RDM). As well as presenting the benefits of taking an active approach to Research Data Management – including increased speed and ease of access, efficiency (fund once, reuse many times), and improved quality and transparency of research – the webinar will advise on strategies for successful RDM, resources to help manage data effectively, choosing where to store and deposit data, the EC H2020 Open Data Pilot and the basics of data management, stewardship and archiving...
