WISE workshop at DI4R, 27 September 2016, Krakow, Poland

WISE Community

Wise Information Security for Collaborating E-infrastructures

WISE held a 1-day workshop on September 27, as part of **DI4R**'s co-located events in Krakow, Poland.

WISE is a global trust community where security experts share information and work together, creating collaboration among different e-infrastructures, providing a framework of standards, guidelines, and practices to promote the protection of critical infrastructure.

Aim

The **aim** of this workshop was to gather the whole community together to review the work done and to give updates about the working groups, as well as sharing inputs about WISE and its future direction.

Besides EUDAT, the event was also sponsored by other **major e-infrastructures** such as [GÉANT](#), [PRACE](#), and HBP.

Target audience

The workshop was attended by around twenty participants belonging to the e-Infrastructures, Research Infrastructures, research/user communities fields.
