All about how EUDAT is supporting research communities. Want to become the next one? Apply to the DECI 14 Call
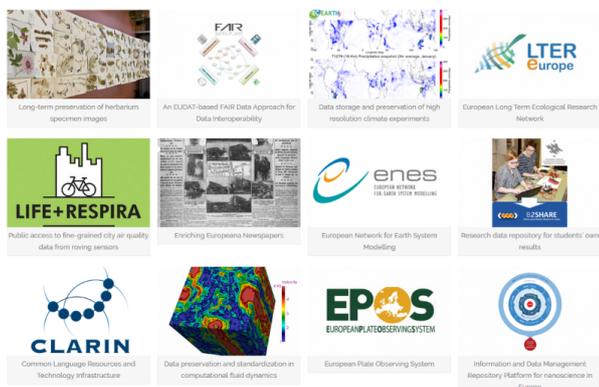

Are you wondering why and how to collaborate with EUDAT? In this newsletter you can understand from our different customers why they have chosen EUDAT and what are the benefits for them.

Interested in collaborating with us? The EUDAT-PRACE joint call DECI 14 is an opportunity waiting for you.
If FAIR data are part of your daily work, don't miss the EUDAT workshop at the 12th International Digital Curation Conference (IDCC17) taking place on 20-23 February 2017 at the Royal College of Surgeons of Edinburgh.

Wondering how European research communities are collaborating with EUDAT? Watch this video

Pursuing an active engagement strategy with stakeholders has always been a priority for EUDAT. One of its main ambitions is to bridge the gap between European research infrastructures and e-infrastructures. Watch this video to understand more about EUDAT collaborations!

EUDAT Use-Cases: Biological sciences, Physical Sciences, Language and literature and much more...

EUDAT is privileged to have close and collaborative relations with many research infrastructures and e-Infrastructures. At present, there are seven core communities – CLARIN , ELIXIR , ENES , EPOS , ICOS , LTER Europe and VPH in the consortium covering the Language & Literature, Biological sciences, Earth and related environmental sciences and Medical biotechnologies disciplines. Experience shows that actively involving user communities in all steps is a must for infrastructure projects, and increases the likelihood of broader uptake of developed services . EUDAT regularly expands its horizons and renews and adds...

Apply now to the joint EUDAT- PRACE 14th DECI Call. Deadline: 21 November 2016, 17:00 CET

EUDAT and PRACE are joining forces to help research communities gain access to high quality managed e-Infrastructures whose resources can be connected together to enable cross-utilization use cases and make them accessible without any technical barrier. The capability to couple data and compute resources together is considered one of the key factors to accelerate scientific innovation and advance research frontiers. This collaboration has already achieved relevant results as five cross-projects, ranging from different scientific fields, have been granted to use approximately 400TB of storage space at different EUDAT centres . These...

Find out how EUDAT services support FAIR data at IDCC, February 2017

The 12th International Digital Curation Conference (IDCC17) will take place on 20-23 February 2017 at the Royal College of Surgeons of Edinburgh, Scotland, with the purpose of bringing together digital curation professionals and educators with data producers and consumers to consider digital curation in a multi-disciplinary context. This

year's programme focuses on the challenge of embedding digital curation in organisational workflows to ensure that not only is data findable, accessible, interoperable and reusable (FAIR), but that we have flexible and resilient infrastructures openly available to support communities in this endeavour....
