

Check out the EUDAT Spring workshop calendar and apply to our Summer School by 17th April!

With the arrival of **Spring**, the EUDAT calendar fills up with exciting events! The countdown to the **first EUDAT & RDM Summer School** has started, register to the **EUDAT-PRACE workshop** on Coupling HPC and Data Resources and services together at EHPCSW2017 and learn more about **Array Databases** at our workshop in Amsterdam! EUDAT is involved in 3 different events in Barcelona next week co-located event with RDA 9th Plenary. And between an event and the other, find out the new semantic annotation service (B2NOTE), learn more about the new metadata catalogue (B2FIND) integration and hear from Arturo Ariño about how EUDAT is contributing to determine low-pollution paths for citizens daily cycle, motor, or pedestrian commute.

Read on to discover all!

Become a Data Management expert with the first EUDAT Summer School

Early-career data scientists and researchers from all over Europe are already submitting their applications for the 1st EUDAT & Research Data Management Summer School! Full and partial scholarships are available to the best scoring applicants: [click here to learn more about application criteria](#)

Join our workshop at the European HPC Summit Week in Barcelona on 18 May 2017

As part of the joint EUDAT and PRACE effort to help research communities gain access to high quality managed e-Infrastructures, EUDAT will hold a workshop on 18 May 2017 on "Coupling HPC and Data Resources and services together" as part of the European HPC Summit Week. [Find out more about the workshop](#)

Register now to the free Array Databases Working Group, 17 May 2017

EUDAT will host the second Array DB WG workshop on 17 May 2017 in Amsterdam, Netherlands, aiming at promoting a broad and fair discussion about real use of Array Databases for research communities. Experts, communities dealing with multidimensional datasets and practitioners are invited to apply: [Find out more about the workshop](#)

Find all EUDAT events at the RDA 9th Plenary, Barcelona, Spain

As co-located events with the 9th RDA Plenary, EUDAT will host a Semantic Working Group on 3-4 April 2017 to improve the discoverability and the interoperability of multi-disciplinary scientific semantic resources, and will participate to the BlueBridge workshop and INDIGO-DataCloud event. [Find out all events happening at RDA 9th Plenary](#)

[Missed our recent B2NOTE webinar? Don't worry, download the materials here!](#)

On 16 March, Dr. Yann Le Franc, expert in Semantic Web and Linked Data technologies held an online webinar on organising, retrieving and aggregating data using annotations with the new B2NOTE service. If you missed the webinar you are still in time to find the right research data management solution for you: [click here to download the materials](#)

[The new B2FIND Integration training component has just been released!](#)

As part of its wide range of training materials, EUDAT has just released the new B2FIND integration training component, with a special focus on metadata ingestion, repositories, harvesting, mapping, validation and uploading. [Check out the B2FIND training section here](#)

[EUDAT data pilot PAIRQURS explains how EUDAT services and 150 “Citizen scientists” are helping to determine low-pollution paths for their daily cycle, motor, or pedestrian commute](#)

Arturo H. Ariño, from Universidad de Navarra in Pamplona, Spain, is the main interface for the PAIRQURS - EUDAT data pilot. At the recent Helsinki User Meeting we asked him how this project will improve the quality of life in Europe and how EUDAT is contributing to its success. [Read the full interview](#)
