

# B2FIND

*<http://b2find.eudat.eu>*

**Hannes Thiemann & B2FIND-Team**

## What is B2FIND?

*... a service for researchers and scientists offering a comprehensive joint catalogue of EUDAT and external cross-community metadata that they can use to find data objects and collections*

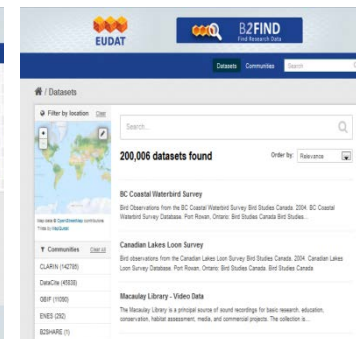

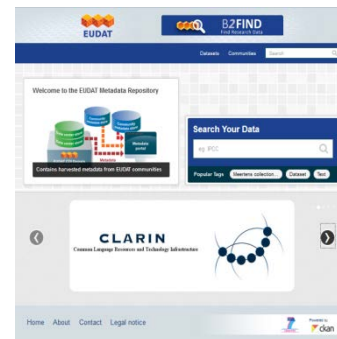

## Why is B2FIND unique?

- **B2FIND's cross-community approach:** mapping harvested metadata from a range of communities, not just closely related or connected but so far unrelated communities e.g.
  - Climate research & social sciences
  - Biodiversity & linguistics (someone talking about animals)
  - Archaeology & seismology
- Low barrier to make data visible and available to others

# B2FIND in a few easy steps

- User
  - Simple and easy-to-use interface
  - No registration necessary
- Metadata Provider
  - Setup OAI-PMH server (support from EUDAT available)
  - Provide stable metadata format

**B2FIND**  
Find Research Data

**B2SHARE**  
Store and Share Research Data

**enes**  
EUROPEAN NETWORK  
FOR EARTH SYSTEM MODELLING

**CLARIN**

Common Language Resources and Technology Infrastructure

Data Archiving and Networked Services

**DANS** NARCIS

**GLOBAL BIODIVERSITY INFORMAT**

**DataCite**  
International Data Citation

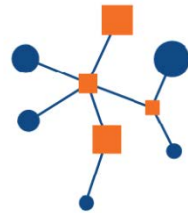

# What are the next steps?

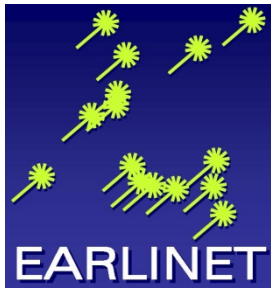

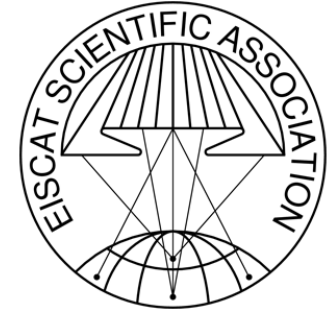

- Address more communities and aggregators**
- Improved functionality of portal**
  - Include a commenting function**
  - Timeline search**
  - Taxonomies**
- Quality**
  - Improve mapping**
  - Feedback mechanism**

**B2FIND**
