## DI4R 2017 Call for Abstracts open!

3

This year's Digital Infrastructures for Research (DI4R) event will take place at the Square Meeting Centre in Brussels on 30 November – 1 December. Jointly organised by EGI, EUDAT, GÉANT, OpenAIRE, PRACE and RDA Europe, it promises to build on the success of last year's inaugural event.

The Call for Abstracts for DI4R 2017 is now open! The Programme Committee invites everyone with an interest in Open Science to bring their voice to DI4R 2017.

Key topics are:

1. Interoperability
2. Data science and skills

3. Impact evaluation and metrics
4. Security, trust and identity
5. The EOSC & EDI building blocks
6. Business models, sustainability and policies

All abstracts – such as contributions on requirements, developments, success stories and gap analyses in the form of presentations, lightning talks, interactive sessions, posters and demonstrations – should be submitted via the DI4R Indico webpage.
