**A EUROPEAN STORAGE AND
DATA MANAGEMENT
INFRASTRUCTURE FOR EOSC**

OPPORTUNITIES

DICE offers over 6 million Euros in adoption funding for researchers allowing them to take advantage of leading edge European data management solutions. These services will be included in the EOSC. Here are the services on offer:

Data Discovery

Making research data findable
Data source harvestable and to make data widely discoverable

Data Repository

Long-term data resources preservation and sharing
To store non-active FAIR data

Policies based Data Archive

Mid-long term data resources, accessible from computing facilities to store non-active research data
Value-added services (integrity checks, replications, ..) for long-term, stable data archives.

Data Archive

Mid term storage resources after/between projects, Accessible from computing facilities to store non-active research data, bitwise preservation

Personal and/or Project workspace

Mid-term storage during project,
Good connection to computing facilities,
To store active resource data
